

Peru 360° program

About this program

Get to know Peru from the inside by visiting the cultural diversity of the 3 regions. In Lima, we will visit two national main museums with collections dating from pre-Inca and colonial times and the bohemian district of Barranco. The adventure will then take us to Paracas to observe the Nazca Lines and explore the Ballestas Islands and its coasts in a different way. The mountains come next. First, we will tour the streets and trails of Arequipa and climb the Colca Canyon, then we will arrive at the colorful islands of Puno and we will approach Cusco, where you will become a local in the warmer communities, walking through the archaeological sites in the Andes. Finally, we venture into the Peruvian jungle, where natural excursions await us in the depths of heavy canopy.
